EDUCATION

Princess Sumaya University for Technology (PSUT) | Amman, Jordan 8/2024 - Present

- B.S. in Software Engineering
- Relevant Coursework: Data Structures, OOP (C++), Intro to SWE, Discrete Math, Statistics, Digital Logic Design, Webpage Design.

American School of Doha (ASD) | Doha, Qatar 8/2016 – 5/2022

- Awards: (i) President's Award for Educational Achievement and (ii) American Citizenship Award.

SKILLS

Languages: C++, Python, C#, Java, C, JavaScript, Dart, PHP, MySQL, HTML, CSS, Assembly (8086).

Frameworks & Tools: AI Assisted Development, React.js, Flutter, GitHub, Git, Microsoft 365, Adobe Creative Cloud.

Other: English & Arabic, Incoterms 2020, photography (award-winning), global adaptability (visited 38 countries).

PROFESSIONAL EXPERIENCE

Montfort FZE | Dubai, UAE | Intern 5/2023 - 7/2023

- Engineered an automated financial tracking system using VBA and Excel macros to synchronize live commodity pricing data with projected trade outcomes, ensuring real-time PnL accuracy.
- Repaired data for thousands of bills of lading and related contracts for all load and discharge ports information from 2,186 trades.
- Prepared oil downstream country profiles for Ghana, Pakistan, Sri Lanka, Bangladesh, and Mozambique.

Gulf Business Machines (IBM Offshoot) | Doha, Qatar | IT Intern 5/2021

- Developed a point-of-sale system using HTML and Java, structuring the project using Microsoft Project.
- Experienced the working environment in IT consulting and software development, as well as discussing IT career options with professionals.

Other Internships:

Muntajat | Doha, Qatar 2023 | Familiarized myself with corporate governance, trade finance, legal, risk and audit.

Wadi NGO | Amman, Jordan 2021 | Used ArcGIS to create land restoration models to analyze and visualize data.

PROJECTS

ESP32 Health Monitor

[GitHub](#)

- Engineered an ESP32-based health monitor utilizing a MAX30102 sensor and custom C++ algorithms to perform real-time PPG signal processing, peak detection, and DC removal for Heart Rate and SpO2 tracking.
- Integrated the Blynk IoT platform for remote data visualization via Wi-Fi and implemented a multi-modal feedback system including a 20x4 LCD interface and synchronized auditory heartbeat alerts.

Personal Portfolio Website

yazanzarka.com

- Designed a responsive Single Page Application (SPA) using React and Vite, optimizing for fast load times and smooth component rendering.
- Developed an interactive project showcase using React Hooks (useState) and integrated React-Swipeable to ensure a seamless touch experience for mobile users.
- Implemented a CI/CD workflow by linking GitHub with Vercel, enabling automated builds and instant production updates upon code commits.
- Configured Vercel Analytics to track real-time visitor metrics and used CSS3 Media Queries to maintain UI consistency across all device screen sizes.

LEADERSHIP AND VOLUNTEERING

Students for Refugees (SFR), non-profit | Texas, USA | Head of International Relations 7/2023 - Present

- Facilitate high-level strategic meetings with global organizations, including UNICEF and UNHCR, to identify and develop partnership opportunities.
- Pioneered the creation of SFR's first international branch in Amman, Jordan, and now oversee operations across branches in London (UK), Amman (Jordan), and Kathmandu (Nepal).
- Obtained 501(c)(3) tax-exempt status and ensure compliance with its legal and financial obligations.

Texas A&M Muslim Students' Association | College Station, TX, USA | Fundraising Chair 8/2022 - 5/2024

- Led a team in organizing a variety of charity fundraising events, including a total of 4 charity auction banquets (one per semester) averaging an attendance of 125 people and raising over \$90,000 over two years.
